

# Determine Your Pearl RING SIZE

In your print dialogue, make sure that scaling is set to 100%.  
After printing the page, measure the scale below. It should be exactly 50 mm long.

## Measure the Ring

If you or the person is already wearing a ring, you can use that ring to measure the size for the new one. Use a measuring tape or even better, use our table of measurements below and place the ring over the circles in our table below. You need to match the **INSIDE DIAMETER** of the ring to the circles. If you measure between two sizes, always order for the larger one.

## Measure the Finger

When buying a ring, make sure it feels snug enough so it doesn't fall off when doing an activity and comfortable enough so it slides over your knuckle with ease.

It's important to know that finger diameter can change depending on what time of the day it is. Fingers tend to be smaller in the morning when inactive and wider at the end of the day when they are fully warmed up. That's why we recommend taking measurements a couple of times throughout the day. Your final ring size would then be the average between those measurements. Also make sure that you don't use stretchable materials (thread, string, rubber seal rings...) to measure your ring size as they can give an inaccurate reading.

## International Ring Size Chart

Diameter(mm)	14.1	14.3	14.5	14.7	14.9	15.1	15.3	15.5
